

ColorMunki Create

ColorMunki Create gives you the tools to create, manage, search, verify and share color palettes. It lets you view your colors accurately with the included monitor calibration device. Works seamlessly with your favorite design applications. Select from PANTONE Colors, extract colors from images and create harmonious color palettes. Use the Print-Safe™ feature to see out of gamut colors. Designed with powerful features and an easy-to-use, intuitive interface, ColorMunki Create will soon become your new best friend.

Macintosh:

PowerPC® G4 or G5 or Intel processor (G5 and higher recommended)

MacOS X 10.4, 10.5 with latest update installed

512 MB RAM (1GB and higher recommended)

300 MB of free disk space

Powered USB Port

1024 x 768 or higher display resolution with 16-bit video card

DVD-ROM drive

QuickTime 7 software required for multimedia features

Internet connection for software installation

Broadband Internet connection required for colormunki.com services

Network card required

Windows:

Microsoft Windows XP 32 & 64 or Vista 32 & 64 with latest service packs installed

Intel® Pentium® 4, Intel Centrino®, or Intel Core™ Duo (or compatible) or AMD Athlon XP or better CPU

512 MB RAM (1GB and higher recommended)

300 MB of free disk space (additional free space required during installation)

Powered USB Port

1024 x 768 or higher display resolution with 16-bit video card DVD-ROM drive

Internet connection for software installation

Broadband Internet connection required for colormunki.com services

Network card required

ColorMunki Create includes a limited seat license with exceptions for camera clubs and educational institutions. [Click here for more information.](#)

ColorMunki Create includes an end user license agreement (EULA) allowing use of the software on up to three computers. Customers acknowledge their agreement to this limited seat license when they accept the EULA during the software installation process. X-Rite ColorMunki allows customers to freely delete the solution from one computer and add to another without requiring any software registration. The ColorMunki activation process is designed to allow the software to connect to the hardware device when first using on designated computer station.

Both educational institutions and camera clubs can receive an extension of the license to include unlimited seat license. In order to receive such extended usage rights, the customer must first register their ColorMunki. Upon completion of the registration, an addendum to the EULA will be generated and the customer will have to accept the terms of the addendum. Upon acceptance, a PDF of the complete EULA addendum will be provided to the customer.

ColorMunki Design

MEET COLORMUNKI DESIGN

The innovative new way to create your own world of color. Ideal for agencies, corporate in-house and freelance designers, this do-everything solution gives you the freedom to design with any color from the visible spectrum, even ones you never thought possible. Select colors from Pantone® PMS and Goe™ libraries, image libraries or capture spot colors from just about any surface, plus preview out-of-gamut by paper type. Includes essential color control functions for calibrating displays, projectors and printers with spot color optimization with a fully integrated all-in-one device. Now you can swing from inspiration to production without losing color quality.

Product Details

COLORMUNKI DEVICE

All-in-One spectrophotometer puts the world of spectral color at your fingertips – easily capture colors and calibrate all your monitors, printers and projectors. A white calibration tile is integrated, so there's nothing to lose or match up to your device. Also includes a protective bag which doubles as an integrated monitor holder and it all fits in the palm of your hand. This truly is your do everything color solution!

COLORMUNKI SOFTWARE

Create with Freedom

The world is jumping with inspiration and with ColorMunki Design the possibilities are virtually limitless. Bring your vision to life as you grab colors from essentially anywhere!

Experience the freedom to swing from palette to palette utilizing any color from the visible spectrum. ColorMunki Design Palette Creation software is so versatile. You can easily:

- create and name unlimited custom color palettes
- select colors from Pantone® and other built-in libraries
- select colors from dynamically associated Harmony, Variation and Similar colors
- capture any color from any surface
- automatically extract color from any image
- search color themes by words like "fresh", "sporty" or "vivid"
- ColorMunki Design provides unique verification tools that allow you to quickly preview your colors before you go to production:
- PrintSafe™ one-click out-of-gamut view for each paper type
- preview palette for CMYK or Spot color print
- evaluate colors under different light sources

Communicate Effortlessly

When everything works together, bringing your vision to final production is the language of great design. ColorMunki provides you with essential communication functions such as:

- automatically synchronize palettes to Adobe® Photoshop®, InDesign® and QuarkXpress® or export to your favorite design and photo applications
- add colors from your OS picker
- view color data in LAB, CMYK and sRGB

Calibrate with Ease

ColorMunki makes sure your design goes from inspiration to screen to print without ever sacrificing quality with the new powerful, self-guided software interface.

Display Calibration

With both easy and advanced modes for LCD and Laptop displays, you'll master the color jungle in a snap. Easy mode has predetermined selections, so you don't need to be a color expert. For those looking for more control over whitepoint, contrast, brightness or ambient measurements, choose the advanced mode. And, DDC auto detect control will quickly determine if your monitor is compliant and if so, perform all advanced calibrations automatically, delivering a high quality profile.

ColorMunki can calibrate multiple displays with ease and provides before and after visualization, as well as calibration reminder prompts.

Printer Calibration

Complete color control and optimized printer profiling makes sure that the color you see on your display is the color that you get.

New RGB and CMYK printer calibration technology delivers outstanding a high quality printer profile quality. Simply scan one test chart of only 50 patches and ColorMunki calculates an interim profile having learned how your printer behaves with these colors. It then produces a second chart of 50 patches that perfects your profile once you scan it. ColorMunki is so smart it even has the ability to optimize your profile based on spot colors so you can achieve the best output for your design work.

With AppSet™, there is no need to worry about what to do with your new printer profile. ColorMunki talks to your design and photo applications and automates the printer profile settings.

Projector Calibration

Tired of making excuses for your projected work? ColorMunki technology will give you fast and accurate projector profiles so you can show your designs on the big screen to clients, family and friends with color confidence!

Make ColorMunki Design your new best friend. It's never been easier to bring your vision to life.

ColorMunki Design INCLUDES: White ColorMunki spectrophotometer, ColorMunki profiling software, ColorMunki ColorPicker, ColorMunki protection bag/monitor holder, Quick Start Guide and USB power cord.

ColorMunki Design includes a limited seat license with exceptions for educational institutions. [Click here for more information.](#)
